

Report on the Quality Mailshot Initiative (2021-2022)

A) Introduction

In 2019, the Quality Assurance Committee (QAC) launched the Quality Mailshot Initiative in order to showcase good quality practices taking place across campus by means of occasional mailshots sent to staff and students. The mailshots feature a brief text with an accompanying image, drafted in cooperation with the entity relevant to the mailshot's content. A standard operating procedure (ZQA-001-02) was developed and updated to outline the whole process.

The schedule devised for the dissemination of these mailshots takes into account examination sessions and recess periods, with at least fourteen days between each mailshot. A degree of flexibility is maintained whenever time-sensitive issues arise, whereby some mailshots are shifted around or retained for future use in order to release mailshots deemed more relevant to the current circumstances. The full schedule of mailshots for academic year 2021-2022 is available at the end of this report.

Following the success of the first two series of mailshots disseminated during academic years 2019-2020 and 2020-2021, the initiative was renewed for academic year 2021-2022. Similar positive reactions have been noted, as further explained below.

B) Overview of Feedback Received

During the academic year 2021-2022, a total of **12** mailshots were sent, and **27** responses were received, thus averaging around two responses per mailshot. These responses generally fell under the following broad categories:

- 1) ***Suggestions for future mailshots***: At the end of every mailshot, recipients are invited to contact the QAC with examples of good quality practices from their own entity, for consideration as potential future mailshots.

- 2) **Positive feedback for the practices shared:** A number of recipients thanked the QAC for sharing these positive practices.
- 3) **Queries stemming from the mailshot:** Some recipients had queries related to the mailshots sent.
- 4) **Other:** A few generic responses did not fit under any of the above categories.

Below is a chart outlining the type of feedback received:

C) Overview of Action Taken

Whenever deemed necessary, relevant action was taken in line with the response received.

Below is an overview of the type of action taken:

- Certain queries that could be dealt with expediently were answered by the QSU. Responses asking for particular details were forwarded to the most relevant department for follow-up.
- Suggestions for future mailshots were considered and those that were deemed relevant for dissemination were included in this year's series, or kept in the pipeline for the next academic year.

- Certain practices shared by respondents were deemed relevant for dissemination on other platforms, e.g. as a news item on Newspoint.
- With regard to the mailshot concerning digital credentials ([‘The Office of the Registrar issues Digital Credentials to all graduands’](#)), three respondents sought further information and were directed to the relevant office.
- With regard to the mailshot concerning the PSY2650 study-unit ([‘Students’ voice matters’](#)), three students expressed their interest in applying, and sought further information. The course coordinator also reported increased interest from students following the mailshot.

Furthermore, QSU staff attending a course in Implementing Quality Management used the Quality Mailshot Initiative as the subject for the final assignment, with the aim of further enhancing the effectiveness of this initiative. As a result, action was taken to broaden the dissemination of the content of these mailshots beyond the email medium, to feature on UM’s social media channels. This has resulted in these good quality practices having a wider reach, which in turn generates more helpful feedback and suggestions.

D) Conclusion

A dedicated section on the QAC website features an [archive](#) of all mailshots sent to date. Apart from the mailshot text, the full mailshots are also made accessible in PDF format. For the third year running, the Quality Mailshot Initiative has been well-received by the University community and has generated appreciable interest. A number of practices have already been earmarked for sharing during the next academic year, following a steady flow of suggestions for future mailshots. The success of this initiative is the result of joint efforts from the staff of the Quality Support Unit, the Marketing, Communications & Alumni Office, IT Services, and staff members from the UM entities involved in the mailshots themselves.
