ACCOUNTING

IM 01

SYLLABUS

Introduction

The syllabus seeks to develop sound financial literacy, and the presentation and evaluative skills required in financial and cost and management accounting.

The Examination

One three (3) hour paper consisting of three sections shall be set.

- **Section A** consists of **one COMPULSORY** question assessing financial accounting. Candidates are requested to produce a set of final accounts from a given trial balance or from single entry records. This question may assess sole traders, companies, manufacturing concerns and also non-profit making organisations. This question carries 24% of the marks.
- **Section B** consists of **four questions** out of which candidates are expected to **answer two**. Each question carries 18% of the marks. This section assesses all Financial Accounting topics, including the topics referred to in Section A above. This section carries 36% of the marks.
- **Section C** consists of **three questions** out of which candidates are expected to **answer two**. Each question carries 20% of the marks. This section assesses all Cost and Management Accounting topics and carries 40% of the mark.

Approximately 20% of the marks of the paper shall be allocated to short theoretical extension questions. Questions of an entirely essay-type nature shall **NOT** be set.

Noiseless and non-programmable calculators will be permitted. **CANDIDATES ARE ADVISED TO SHOW THEIR WORKINGS.**

FINANCIAL ACCOUNTING	Notes for Guidance – Section A & Section B

APPENDIX - Suggested Accounting Ratios

Gross Profit margin	=	$\frac{\text{Gross Profit}}{\text{Net Sales}}$	x	100
Mark up	=	$\frac{\text{Gross Profit}}{\text{Cost of Sales}}$	x	100
Net Profit margin	=	$\frac{\text{PBIT}}{\text{Net Sales}}$	x	100
Or	=	$\frac{\text{Net Profit}}{\text{Net Sales}}$	x	100
ROCE	=	$\frac{\text{PBIT}}{\text{Capital Employed}}$	x	100
Utilisation of capital employed	=	$\frac{\text{Net Sales}}{\text{Capital Employed}}$	x	100
Current ratio (Working Capital ratio)	=	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$		
Quick (Acid Test) ratio	=	$\frac{\text{Current Assets} - \text{Inventory}}{\text{Current Liabilities}}$		
Inventory Turnover	=	$\frac{\text{Cost of Sales}}{\text{Average Inventory}}$		
Collection period of receivables	=	$\frac{\text{Trade Receivables}}{\text{Credit Sales}}$	x	365
Payment period of payables	=	$\frac{\text{Trade Payables}}{\text{Credit Purchases*}}$	x	365

*If purchases are not given and cannot be calculated, Cost of Sales may be used.

N.B.

Capital Employed = Issued Ordinary Shares + Reserves + Non-Current Liabilities
Alternative acceptable methods of calculating the above ratios are acceptable.
